Trainees feedback:

Harish Bhai visited GVT-VTC on 15th march 2012, to collect his MES certificate. During the visit he told about the benefits of the training he is experiencing while working on various sites.

He said, "Before training I didn't know enough about the tools and equipment used in plumbing trade like there names, correct method of use, safety precautions required to be observed etc. but during the training, I learned all these things. I also learned various new things like types of pipes used, their fixing system, quality, requirement of correct size of pipe at different location and for different uses etc. This new information and techniques enhanced my capability and knowledge. Now I am confident to handle a small site independently. My quality of work is appreciated by engineers and architects visited my work at site, time to time. It gives me a sense of satisfaction and I get motivated to work even better. Although I am still learning various new things while working at practical field but I have developed an ability to understand new concepts, methods etc. easily."

When asked about his daily earning and said "Before training I used to work as a labor and getting quite less wages. Also I did not get work regularly but after going through the training course my confidence level, speed and quality of work all increased and it contributed to increase my earning to nearly double". He added "Within a year, I will start my own business and may provide employment to others in this field. I am thankful to the GVT-VTC, its very considerate trainers and all the staff for providing very knowledgeable and rigorous training. I have suggested my other friends/ relatives to join a training programme in this institute."

Mr. A.K.Jain, Technical Advisor, GIZ IS and Mr. K.V. Rao, Training coordinator, GVT-VTC discussed with Harish bhai about various issues related to training of construction workers like duration of training, amount of stipend given during the training, etc. He suggested not to increase the duration of the training for longer days as it will affect the number of persons joining the training.

Case: 2.

March-12	Rs. 450-500/day	do

Trainee's feedback:

My dream comes true

Chatrasingh Bhai said, "Before training I was working on a daily wages, as a labor, near around my village and used to get Rs.150- 200/- per day. That too not on a regular basis. Now after receiving the mason training at GVT-VTC, I started working with Sri Bharat Bhai (Mukaddam), who was known to me before. I worked there for about one month without negotiating any wages but on the basis of my performance soon I started getting Rs 350/- a day with regular work opportunity in hand. With the time (in about 2 months) my speed and accuracy improved substantially and now I am earning about Rs. 500/- per day on the basis of the quantity of work I deliver."

He added, "I am confident that after one or two years of experience, I will become capable to start taking small contracts. By doing so I can increase my earning and also employ people."

He also said, "It was unbelievable to rely on the claims made by the GVT personnel, who visited my village to inform about the trainings being imparted in GVT-VTC, that, it is possible to earn up to Rs 10000/month, even if one is only 5th pass. To achieve it all one has to do is to go through the training with full participation and interest. I joined the training but still I used to dream to earn Rs. 10000/- Per month. But today after few months of training, I have developed the competence which is fetching me the amount of money even more than I used to dream. This is how my dream comes true."

I would like to place the entire credit for this achievement to GVT-VTC. I give my heartily thanks to GVT-VTC for providing me intensive skill training and relevant information which has helped to improve my life.
